Pro2Serve and S&K Aerospace Granted SBA Mentor Protégé Agreement

Oak Ridge TN, February 18, 2009 - Professional Project Services Inc. (Pro2Serve) received approval from the Small Business Administration (SBA) for a Mentor-Protégé Agreement with S&K Aerospace, LLC. (SKA). Under this agreement, Pro2Serve provides developmental assistance and mentoring to SKA, primarily in the environmental services market.

The SBA Mentor-Protégé program enhances the capability of 8(a) participants to compete more successfully for federal government contracts. The program encourages private-sector relationships and expands SBA's efforts to identify and respond to the developmental needs of 8(a) clients.

"As a tribally owned 8(a) company, SKA has been successful in obtaining several government contracts, mostly through the U.S. Department of Defense," said Jim Paro, SKA President. "This Mentor-Protégé Agreement will allow us to benefit from Pro2Serve's expertise as we expand our services into DOE and the environmental market."

SKA and Pro2Serve began their relationship in 2007 on the Moab, Utah, Technical Assistance Contract (TAC) for the Department of Energy. This new agreement provides SKA access to the resources, capabilities and experience of Pro2Serve. "We are very pleased to have this agreement with SKA," said Pro2Serve President Dr. L. Barry Goss. "We look forward to mentoring SKA as they grow into the environmental market and building upon our already successful relationship."

Incorporated in 2005, SKA is a certified SBA 8(a) company owned by the Consolidated Salish and Kootenai Tribes and is headquartered in Montana on the Flathead Indian Reservation. They provide services to a variety of clients in the federal government and private sector. SKA has offices in Alaska, Texas, Washington, and in Utah and Colorado where they teamed with Pro2Serve on the Moab TAC.

Pro2Serve provides critical infrastructure technical and engineering services in support of our nation's security. For over 20 years, Pro2Serve has solved complex environmental problems for federal, state and local clients by delivering solutions that include environmental planning and management, compliance and waste management. Headquartered in Oak Ridge, Tennessee, Pro2Serve employs over 340 engineers and professionals nationwide to support infrastructures in the defense, science and energy markets, and across the nuclear weapons complex.
